**RE:** **Wards Creek Project Additional acreage recommendation**

Based on my recent field visits with Ms. Christine Wentzel of the St. Johns River Water Management District (SJRWMD), I am recommending that the County purchase additional lands from Mr. Craig Maguire at the Ward Creek project site.

During our site visits, it became apparent that site conditions had changed significantly from several years ago, when SJRWMD had toured the project. As a result of the recent silvicultural activities outside the large basin swamp, the overstory has been removed, which has allowed for the natural release and recruitment of numerous grasses, forbes, and shrubs. This natural process was viewed by Ms. Wentzel as an enhancement of the area targeted for purchase, as it has created increased biological diversity, improved wildlife habitat, and increased ecological function and value. Adding this type of habitat (either wetlands or uplands) to the existing buffer, all of which can be used for mitigation, should result in more favorable ratios, than if only the current boundary was purchased.

Receiving lower mitigation ratios directly lowers mitigation costs, while enhancement-type mitigation projects also helps gain regulatory approval easier (all else being equal). Because of these two factors, purchase of up to twenty additional buffer acres will provide the county with a more cost-effective and time-saving mitigation opportunities. We are working with SJRWMD to finalize the re-aligned boundary, and anticipate having a final acreage within the next two weeks.

Please advise if additional information or assistance is needed (461.8305).
