Mr. Tackett,

Please find attached Estimate #507 for San Diego Road. We will set up MOT Message Boards one week prior to construction. MOT signs and drums will be placed to make only one lane in each direction operable. We will then set up erosion control and begin clearing and grubbing. We will remove existing pipe and structures. Asphalt will be cut and removed and will be hauled off with concrete removal.

We will lay the first 534 LF of 36" RCP pipe, and then set structures adjacent to the golf cart path. We will remove PVC pipe in the roadway, place the structures and pipe across roadway with 36" RCP pipe. Then we will tie into the Type E inlet with 18" RCP and will set structure 6 & 6A structure lay in the remaining ERCP in the remainder of the pipeline with structures. We will pour the type E inlet with wings and DOT P-5 & P-6 Storm Inlet tops. Replace all irrigation and sprinklers. We will prep existing ground for sidewalk to be placed. Dress out and sod equal to what has been removed. There will be one lane each way open in the evenings when work is not being done. Job will take 180 days. Scheduling will be October 1st through March 30, 2020. As a reminder AWA will be closed November 28/29 for the Thanksgiving Holiday and we will be shut down roughly for two weeks in December as we do each year. We will shutdown Dec. 24th through January 5th. We will be back to work on January 6th.
